

What did I do since the last meeting

- 1) Reviewed Announcements
- 2) I reviewed W04 Readings
  - a> Ch8: Forms
  - b> Ch12: Object Oriented Programming
- 3) Reviewed my Udemmy Course
- 4) Prepare Team Meeting
  - a> Created Zoom Link for team meeting
  - b> Sent link to team inviting them to the team meeting
  - c> Created basic html file for the team to work
  - d> opened meeting and waited for Lusanda Mavuma
  - e> while waiting for Lusanda to attend the meeting I worked on several solutions for the team meeting
  - f> Got a note from Lusanda that she could not attend meeting till later in the day at 8:00 PM MST
  - g> Continued to work on solutions for team meeting changing placement and function of the button and resetting display
  - h> later in day created new link for Lusanda and sent the link
  - i> Again, waited at the appointed time for Lusanda while I continued to work on the code.
  - j> Sent copy code I spend the day working on to Lusanda Mavuma
  - k> Success I got a note from both Lusanda and Elias that they were waiting at my zoom link as my link has no waiting room that were waiting for me when I opened the link again.
- 5) I created notes on what I have done this week and posted them to Week 4 assignments
- 6) Update GitHub depository to reflect this week's work
  - a> On Sunday after church I found my reading assignment link in canvas was a mess.
  - b> I learn a new way to convert my notes a pdf and then display the pdf on an html so I want to rewrite this page in word, convert it to a pdf and then display it with html.
  - c> I will then resubmit my reading and hope it makes it easier for others to read.
- 7) What am I going to do next?
  - a> take some time on Sunday and review next week's assignments and set daily goals
  - b> prep for next week's team meeting
  - c> if time permits review functions and divs
- 8) review on Sundays last two weeks reading and go over Udemmy courses
- 9) What are my blockers?
  - a> I still cannot code from a blank page. I think I can learn to modify existing code like the teachers solution but don't ask me to do a team assignment in less then an hour from a white page.
